SUMMARY

Software Engineer passionate about building impactful products. Experienced developing responsive web applications, cross-platform mobile apps with React Native, and interactive systems using Godot and modern cloud services. Strong problem-solver with a solid CS foundation and a focus on performance, usability, and clean code. Thrive in fast-moving environments where technology can make a real difference.

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, TypeScript, HTML, CSS, GDScript

Frameworks & Tools: React Native, React, Node.js, Unity, Godot, Docker, Git, Linux, Firebase

EXPERIENCE

Freelance Web Developer (Feb 2026 – Present)

- Built a fully responsive single-page website for a catering business using HTML5, CSS3, and Vanilla JavaScript with zero dependencies or build tooling.
- Implemented custom features including a vanilla JS image lightbox, IntersectionObserver scroll-reveal animations, glassmorphism sticky navbar, and direct contact CTAs (phone, WhatsApp, email).
- Delivered full RTL/Hebrew support, mobile-first CSS Grid layout, and performance optimizations (lazy loading, passive scroll listeners, fluid clamp() typography).

PROJECTS

NourishNet - React Native (Expo), Firebase, Google Maps API

- Developed a cross-platform mobile application using React Native (Expo) and Firebase to connect users with local community resources like food banks and shelters.
- Integrated Google Maps API and Expo Location to provide real-time geolocation services, enabling users to find nearby resources with interactive map/list toggles and distance-based filtering.
- Implemented a robust backend with Firestore for dynamic data retrieval and AsyncStorage for local persistence of user favorites and preferences.

Discrete Math Escape Room - Godot Engine / GDScript

- Developed a 2D top-down RPG in Godot Engine (GDScript) designed to teach Computer Science concepts through interactive gameplay.
- Engineered a modular mini-game system implementing logic puzzles for Affine Ciphers, Set Theory, and Truth Tables.
- Built a robust Interaction System and Singleton-based Dialogue Manager to handle game state and narrative progression.
- Designed and implemented complete UI/UX flows including Main Menu, Pause Menu, and dynamic Player HUD.

EDUCATION

B.S. Computer Science - John Carroll University

GPA: 3.84 | Dean's List | Concentrations: Game Dev, Web Dev, Software Dev

LANGUAGES

Hebrew (Native), English (Advanced)
